Index ☐ Volume 52, 2004

ARTICLES (by title)

Achievement Differences in Structured Versus Unstructured Instructional Geometry Programs, by Robert D. Hannafin, 52:1, 19–32.

Applying Activity Theory to Computer-Supporte Collaborative Learning and Work-Based Activities in Corporate Settings, by Betty Collis and Anoush Margaryan, 52:4, 38–52.

A Conceptual Framework for Scaffolding Ill-Structured Problem-Solving Processes Using Question Prompts and Peer Interactions, by Xun GE and Susan M. Land, 52:2, 5–22.

Content Analysis of Online Discussion Forums: A Comparative Analysis of Protocols, by Rose M. Marra, Joi L. Moore, and Aimee K. Klimczak, 52:2, 23–40.

Design Languages, Notation Systems, and Instructional Technology: A Case Study, by Sandie H. Waters and Andrew S. Gibbons, 52:2, 57–68.

Designing E-Learning Environments for Flexible Activity and Instruction, by Brent G. Wilson, 52:4, 77–84.

Designing Electronic Collaborative Learning Environments, by Paul Kirschner, Jan-Willem Strijbos, Karel Kreijns, and Pieter Jelle Beers, 52:3, 47–66.

A Development Research Agenda for Online Collaborative Learning, by Thomas C. Reeves, Jan Herrington, and Ron Oliver, 52:4, 53–66.

The Effects of Visual and Verbal Coding Mnemonics on Learning Chinese Characters in Computer-Based Instruction, by Mei-Liang Amy Kuo and Simon Hooper, 52:3, 23–38.

Examining the Effects of Text-Only and Text-and-Visual Instructional Materials on the Achievement of Field-Dependent and Field-Independent Learner During Problem-Solving with Modeling Software, by Charoula Angeli and Nicos Valanides, 52:4, 23–36.

Expert Concept Mapping Method for Defining the Characteristics of Adaptive E-Learning: ALFANET Project Case, by Slavi Stoyanov and Paul Kirschner, 52:2, 41–56.

A Five-Dimensional Framework for Authentic Assessment, by Judith T. M. Gulikers, Theo J. Bastiaens, and Paul A. Kirschner, 52:3, 67–86.

Introduction to Part I of Two-Part Special Issue: Design, Development, and Implementation of Electronic Learning Environments for Collaborative Learning, by Paul Kirschner, 52:3, 39–46.

Introduction to Part II of the Special Issue: Design, Development, and Implementation of Electronic Learning Environments for Collaborative Learning, by Paul A. Kirschner, 52:4, 37.

Paradigms in the Theory and Practice of Education and Training Design, by Irene Visscher-Voerman and Kent L. Gustafson, 52:2, 69–89.

Self-Regulation in a Web-Based Course: A Case Study, by Joan L. Whipp and Stephannie Chiarelli, 52:4, 5–22.

Shall We Dance? A Design Epistemology for Organizational Learning and Performance, by Gordon Rowland, 52:1, 33–48.

Student Feedback in the College Classroom: A Technology Solution, by James L. Fitch, 52:1, 71–81.

Student Self-Evaluation, Teacher Evaluation, and Learner Performance A Conceptual Framework for Scaffolding, by Zane Olina and Howard J. Sullivan, 52:3, 5–22.

The Trouble with Learning Objects, by Patrick E. Parrish, 52:1, 49–67.

Turning Electronic Learning Environments into Useful and Influential 'Instructional Design Anchor Points', by Jan Elen, 52:4, 67–73.

Validity in Quantitative Content Analysis, by Liam Rourke and Terry Anderson, 52:1, 5–18.

Acts of Inquiry in Digital Dramas: A Study of Student-Generated Questions in a Global, Telecollaborative Learning Activity, by R. W. Burniske, 52:4, 99–115.

Carriers, Dual Perceptions, and the Information Communication Revolution, by Fathali M. Moghaddam, and Nadezhda M. Lebedeva, 52:1, 83–87.

Cyber-Communities: Idle Talk or Inspirational Interaction?, by Meira van der Spa, 52:2, 97–105.

Editor's Note, by Abbas Johari, 52:2, 91.

Editor's Note, by Abbas Johari, 52:3, 91.

The Impact of Instructional Technology in Turkey, by Cengiz Hakan Aydin, and Marina Stock McIsaac, 52:1, 105–112.

The Impact of Instructional Technology (IT) Culture on Developing Countries, (Editor's Note), by Abbas Johari, 52:1, 82–83.

The Impact of Instructional Technology Interventions on Asian Pedagogy, by Heng-Yu Ku, Cheng-Chang Pan, Ming-Hsiu Tsai, Yedong Tao, and Richard A. Cornell, 52:1, 88–92.

Information Technology-Driven Education in Japan: Problems and Solutions, by Haruko Uchida, 52:3, 91–100.

Instructional and Information Technology in Papua New Guinea, by Amy S.C. Leh and Richard Kennedy, 52:1, 96–101.

The Residual Impact of Information Technology Exportation on Thai Higher Education, by Michael Miller, Mei-Yan Lu, and Thapanee Thammetar, 52:1, 92–96.

Singapore's Learning Sciences Lab: Seeking Transformations in ICT-Enabled Pedagogy, by Chee-Kit Looi, David Hung, Jeanette Bopry, and Thiam-Seng Koh, 52:4, 91–99.

Training Students in Information Technology for the Corporate World: The French Side of a European Union Survey, by François Marchessou, 52:2, 92–97.

Two Categories of E-Learning in Japan, Minoru Nakayama and Rowena Santiago, 52:3, 100–111.

Web-Based Instruction in China: Cultural and Pedagogical Implications and Challenges, by Doris Lee, 52:1, 101–105.

RESEARCH ABSTRACTS (by title)

Adoption of Computer-Based Instructional Methodologies: A Case Study. Samuel Ebersole and Marge Verndam, 52:4, 118.

An AlphaSmart for Each Student: Do Teaching and Learning Change with Full Access to Word Processors? Michael Russell, Damian Bebell, Jennifer Cowan, and Mary Corbelli, 52:3, 114.

Analyzing Software Piracy in Education. Lee James Lesisko, 52:4, 119–120.

The Authentic Performance-Based Assessment of Problem Solving. David Curtis and Rob Denton, 52:4, 120.

Be the Technology: Redefining Technology Integration in Classrooms. Steven C. Mills and Robert C. Tincher, 52:3, 113–114.

The Challenge of Being an Instructional Designer for New Media Development: A View from the Practitioners. Min Liu, Scott Gibby, Ondrea Quiros, and Elaine Demps, 52:4, 117.

Changing Teachers' Perceptions and Use of Technology in the Classroom. Karen S. Ivers, 52:1, 116.

Climbing the STAIRS: Preservice Social Studies Teachers' Perceptions of Technology Integration. George B. Lipscomb and Frans H. Doppen, 52:3, 115.

A Comparison of Two and Four-Year College Student Use of Study Skills and Technology Use. James Kuo, Michael T. Miller, and Chris Hagie, 52:4, 120–121.

Computer Proficiency: The Digital Generation Gap. Nina Kelty, 52:1, 115–116.

Designing Online Instruction: Analyzing the Process, Product, and Implementation. Arlene C. Borthwick, Constance L. Cassity, and Kate E. Zilla, 52:1, 115.

The Digital Disconnect: The Widening Gap Between Internet-Savvy Students and Their Schools. Douglas Levin, and Sousan Arafeh, 52:2, 108–109.

Do Instructor-Provided On-Line Notes Facilitate Student Learning? Jerrold E. Barnett, 52:4, 117.

The Effects of a Web-Based Information Feedback System on Academic Achievement Motivation and Performance of Junior High School Students. Stephen M. Zappe, Brian C. Sonak, Maxwell W. Hunter, and Hoi K. Suen, 52:2, 107.

The Effects of Educational Technology upon the Critical Thinking and Analytical Skills of Below Grade-Level and or Non-College Bound High School Students. Alex Santavenere, 52:4, 117.

Emerging Patterns of Technology Affordances in Teacher Discourse. Alan L. Li, 52:1, 114–115.

Environmental and Personal Factors Affecting K–12 Teacher Utilization of Technology. Rebekah Fulton Hanks, 52:3, 114–115.

Ethnographic Study: @ONE Technology Training Project Study. Susan Obler and Eva Schiorring, 52:3, 112–113.

Experience Counts: Comparing Inservice and Preservice Teachers Technology-Integration Decisions. Joycelin Palacio-Cayetano, Stephanie Schmier, Sara Dexter, and Ron H. Stevens, 52:3, 115.

How Does Computer Availability Influence Science Achievement? Meichun Lydia Wen, Lloyd H. Barrow, and John Alspaugh, 52:2, 107–108.

How New Teachers Use Technology in the Classroom. Maxine Morris, 52:4, 118.

'I Did Not Plan Ahead': Preservice Teachers' Concerns Integrating Print-Based Literacy Lessons with Computer Technology. Janet C. Richards, 52:1, 116–117.

The Impact of Technology on Teaching and Learning in an Elementary Science Classroom. Kate Popejoy, 52:2, 107.

Impact of Vicarious Learning Experiences and Goal Setting on Preservice Teachers' Self-Efficacy for Technology Integration: A Pilot Study. Ling Wang and Peggy A. Ertmer, 52:4, 116.

Increasing Student Learning, Technology Use, and Computer Skills via Use of WebCT in an Undergraduate Child Development Course: A Pre-Post

Course Evaluation Study. Adam Winsler, and Louis Manfra, 52:2, 109.

Integrating Instructional Technology in the California Community Colleges. William J. Doherty, and Catherine Ayers, 52:2, 108.

Integration of Laptops into a K–12 Learning Environment: A Case Study of a Science Teacher in the Middle School. Chia-chi Yang, 52:4, 118.

A Journey of Transformation: A Model of Educators' Learning Experiences in Educational Technology. Kathleen P. King, 52:2, 109.

Learning from Hypertext and the Analyst-Intuition Dimension of Cognitive Style. Martin Graff, 52:4, 119.

Methods That Work: Educator Competencies for Technology in Public Schools. Miguel Guhlin, Leo Ornelas, and Richard Diem, 52:1, 114.

Middle School Technology Use—Design Impediments versus Classroom Needs. Ronald J. Abate, and Joshua Gisemba Bagaka's, 52:3, 113.

Multimedia Case-Based Support of Experiential Teacher Education: Critical Self Reflection and Dialogue in Multi-Cultural Contexts. David S. McCurry, 52:1, 117.

The New Technicians Study: Opportunities for Entry-Level Workers in Information Technology Occupations. California State Department of Employment Development, Labor Market Information Division, 52:4, 119.

Online and Technology-Enhanced Classroom Instruction: A Comparative Study of Student Achievement. David Hyllegard, and David M. Burke, 52:1, 116.

The Role of Teacher Training on Student Computer Use in Illinois at the Third Grade Level. Annette Bedard, 52:3, 113.

Searching for Educational Content in the For-Profit Internet: Case Study and Analysis. Bettina Fabos, 52:1, 115.

A Study of Changes in Attitude Towards Science in a Technology Based K–8 Preservice Preparation Science Classroom. Rena Faye Norby, 52:2, 108.

A Study of the Relationship Between Symbolic and Technology Assisted Play in Literacy Development. Sharon Jean Allen, 52:2, 106–107.

Teaching with Technology: Use of Telecommunications Technology by Postsecondary Instructional Faculty and Staff in Fall 1998. Statistical Analysis Report. Edward C. Warburton, Xianglei Chen, and Ellen M. Bradburn, 52:1, 113–114.

Technology Integration in an Elementary Science Classroom: Its Impact on Teaching and Learning. Kate Popejoy, 52:3, 114.

Telecommunications as a Context for Supporting Science Teachers Implementing Technology in the Classroom. Mary E. Hatton and Gerald Abegg, 52:4, 118–119.
